

# Performance Fabrics

BY KING HICKORY

Performance Fabrics by King Hickory are designed with your family in mind. These fabrics are inherently stain resistant, exceptionally durable, and easily cleaned. By combining our hardwood frame, eight way hand tied spring system, and high resiliency cushioning with a performance fabric, your family can rest assured that their purchase will provide the utmost in quality and dependability.

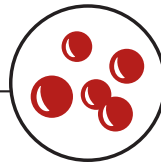

## Stain Resistant

**+P** fabrics resist and protect against stains. The properties within these fabrics make them practically childproof. Stains and spills will disappear after blotting with a dry or damp cloth. In more extreme cases, a combination of water and a small amount of mild soap will ensure the removal of the stain.

## Durability

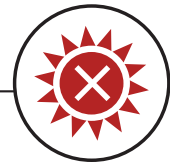

**+P** fabrics can handle life's wear and tear. These fabrics exceed heavy duty wearability standards. They are crafted of extremely durable fibers and are resistant to high abrasion, cracking, and pilling.

## Repellency

**+P** fabrics are repellent and make cleaning incredibly easy. When accidents occur, liquids will simply bead up on the surface of the fabric. Blotting with a cloth is usually all that is required even with the most difficult stains such as coffee and wine.

*Certain Performance Fabrics do not repel liquid. See [www.kinghickory.com](http://www.kinghickory.com) for list.*

## Fade Resistant

This **+P** fabric is unmatched in resistance to fading and the degrading effects of the sunlight. The color will not fade or wash away.

*Only Sunbrella fabrics are UV resistant. See [www.kinghickory.com](http://www.kinghickory.com) for list.*
